

*Planning Resolution between
Deputy Secretary of Health and Human Services
Alex M. Azar II and Governor Matt Blunt of Missouri*

Whereas:

1. Influenza pandemics have occurred three times in the last century, and history and science suggest that the country and the world could face one or more pandemics in this century;
2. A pandemic can cause severe illness, death and disruption throughout the country and the world, and outbreaks can occur in many different locations all at the same time;
3. Preparing for an influenza pandemic requires coordinated action at all levels of government - federal, state, local, tribal - and all sectors of society, including businesses, schools, faith-based and community organizations, families and individuals;
4. The federal government has committed to taking a leadership role in creating a prepared Nation by monitoring international and domestic outbreaks, providing funding and technical assistance to foster local and state preparedness, stockpiling and distributing countermeasures, developing new treatments, and coordinating the national response;
5. The Secretary of the United States Department of Health and Human Services (HHS) has committed to holding pandemic planning summits in all 50 states, assisting states to improve their level of preparedness;
6. President George W. Bush asked Congress for emergency spending authority to prepare the United States against the possibility of a pandemic. The Congress has provided over \$3 billion for that purpose in the Defense Appropriations Act for 2006, including funding for state and local planning purposes;
7. States and local communities are responsible under their own authorities for responding to an outbreak within their jurisdictions and having comprehensive pandemic preparedness plans and measures in place to protect their citizens;
8. Consistent with its authorities and availability of funding, HHS may provide additional resources for State and local influenza planning and preparedness activities, and require specific preparedness goals and achievement of these goals from States and localities as a condition of financial assistance;
9. Preparedness plans must be continuously exercised and updated to make sure they work and to achieve a stronger level of preparedness; and
10. Pandemic preparedness will help communities deal with any type of medical emergency and will have lasting benefits for the health of our Nation;
11. HHS and Missouri share common goals, and have shared and independent responsibilities for influenza planning and preparedness.
